AVOX Completes Government Developmental Test Readiness Review

AVOX Systems Inc. is pleased to announce that it has successfully passed contractor Design Validation Testing and the government Developmental Test Readiness Review (DTRR) for both versions of the Joint Service Aircrew Mask (JSAM): MPU-5(V)/P, which is the standard for all helicopters, and MPU-6(V)/P, which is the AH-64 unique respirator. AVOX Systems Inc. has received government approval to deliver JSAM assets for government Developmental and Operational Testing (DT/OT).

AVOX Systems Inc., formerly Scott Aviation, is now part of the Aircraft Systems Segment of Zodiac. AVOX Systems is a worldwide leader in the design, manufacture, and maintenance of respiratory protective equipment for the civil and military aerospace markets. Its products include chemical and gaseous oxygen supply equipment, passenger and crew masks, and general aviation accessories. By joining the Zodiac Group, AVOX Systems has become a complete system provider for all aviation oxygen needs.

AVOX's conveniently located repair centers across the U.S. offer an extensive exchange inventory and provide the industry's most competitive turnaround times for repair and overhaul of oxygen breathing systems.
